

Cerium Oxide CeO₂ Jade Polishing Powder 668-4

Applied in polishing of all kinds of ,jade. Jadeite.

REO≥90%

CeO₂/REO≥80%

Fluorine content: 3.0%

Average granularity D50: 1.5μm

Granularity: 1500# -1800#

PH value: 7

Color: Light yellow

Cerium Oxide CeO₂ Jade Polishing Powder 668-4 is especially used for polishing jade etc. Compared with other normal polishing powder, this Cerium Oxide CeO₂ Jade Polishing Powder 668-4 is best in physical and chemical properties, and the polishing efficiency of Cerium Oxide CeO₂ Jade Polishing Powder 668-4 is 3 times better than other market polishing powder.

Polishing Powder

UCOLIN^{COM}

**Main features:**

- 1-High polishing speed, great grinding ability, no scratch.
- 2-Small amount and low concentration of Cerium Oxide CeO₂ Jade Polishing Powder 668-4 can make the optimum polishing effect. Save cost.
- 3-Good polishing brightness, High content of Cerium Oxide, reasonable collocation of the crudeness and fineness, applicable to polishing jade, etc.
- 4-Good suspensibility, not easy to settle. And even if the powder is settled for a long time, it is still easy to stir up without bubbles.
- 5-Environmental-friendly, neutral in PH value, water-fast, good adhesive force, easy to wash, no odors, humidity-resistant, long life time.

Packing:

Inner packing: plastic bag,

Weight: 5kg per bag.

Outer packing: cardboard carton, cardboard barrel, plastic barrel

Net Weight:

20kg/ cardboard carton, 25kg/ cardboard carton,

40kg /cardboard barrel, 50kg /cardboard barrel,

20kg/ plastic barrel, 25kg/ plastic barrel.
