

Cerium Oxide CeO₂ Polishing Powder in Ceramic

UCO-338

**Polishing Powder**UCOLIN^{COM}**Main technical data:**REO \geq 75%CeO₂/REO \geq 75%

Fluorine content: 3%

Average granularity D50: 1.4 μ m

Granularity: 800#-1000#

PH value: 7

Color: Off white

UCO-338 Ceramic Polishing Powder is especially used for polishing ceramics, tile, etc. It has many advantages, including strong cutting force, high polishing speed, high gloss finish, good suspensibility, not easy to settle. The polishing effect of brownish red polishing powder is three times better than that of normal ceramic polishing powder.

Main features:

1. High polishing speed, great grinding ability, no scratch.
2. Small amount and low concentration of polishing powder can make the optimum polishing effect.
3. Good polishing brightness, High content of Cerium Oxide, reasonable collocation of the crudeness and fineness, applicable to polishing different ceramics and tiles.
4. Good suspensibility, not easy to settle. And even if the powder is settled for a long time, it is still easy to stir up without bubbles.
5. Environmental-friendly, neutral in PH value, water-fast, good adhesive force, easy to wash, no odors, humidity-resistant, long life time.

Applicable fields:

This serial of polishing powder has been widely applied for the final polishing of ceramics and tiles.

Packing:

Inner packing: plastic bag,

Weight: 5kg per bag.

Outer packing: cardboard carton, cardboard barrel, plastic barrel

Net Weight:

20kg/ cardboard carton, 25kg/ cardboard carton,

40kg /cardboard barrel, 50kg /cardboard barrel,
20kg/ plastic barrel, 25kg/ plastic barrel.
