

Cerium Oxide CeO₂ Polishing Powder in Crystal

UCO-668

Model: Crystal Polishing Powder szf-668

Main technical data:

REO≥85%

CeO₂/REO≥80%

Fluorine content: 3%

Average granularity D50: 1.5μm

Granularity: 1200# -1500#

PH value: 7

Color: Light yellow

Crystal Polishing Powder is especially used for polishing crystal, crystal lamp etc. Compared with other normal crystal polishing powder, this crystal polishing powder can decrease 11% of the polishing powder liquid concentration, and the polishing effect can increase 35%. Besides, the gloss finish of the finished product can get higher grade, and the yellow polishing powder's life time increases 30%.

**Polishing Powder**UCOLIN^{COM}**Main features:**

1. High polishing speed, great grinding ability, no scratch.
2. Small amount and low concentration of polishing powder can make the optimum polishing effect.
3. Good polishing brightness, High content of Cerium Oxide, reasonable collocation of the crudeness and fineness, applicable to polishing various crystals, rhinestone, millstone, etc.
4. Good suspensibility, not easy to settle. And even if the powder is settled for a long time, it is still easy to stir up without bubbles.
5. Environmental-friendly, neutral in PH value, water-fast, good adhesive force, easy to wash, no odors, humidity-resistant, long life time.

Applicable fields:

This serial of polishing powder is applicable for the final polishing of crystals, crystal lamp, crystal accessories.

Packing:

Inner packing: plastic bag,

Weight: 5kg per bag.

Outer packing: cardboard carton, cardboard barrel, plastic barrel

Net Weight:

20kg/ cardboard carton, 25kg/ cardboard carton,

40kg /cardboard barrel, 50kg /cardboard barrel,

20kg/ plastic barrel, 25kg/ plastic barrel.
