

Polishing Powder

UCOLIN^{COM}

Rare Earth Cerium Oxide Micro-crystal Polishing Powder -558-1

REO \geq 81%

CeO₂/REO \geq 76%

Fluorine content: 3.2%

Average granularity D50: 1.4 μ m

Granularity: 1000# -1200#

PH value: 7

Color: Kermesinus

Applicable fields:

This serial of Rare earth Cerium Oxide CeO₂ micro-crystal has been widely applied in the polishing of micro-crystal plates and micro-crystal glass.

Rare earth Cerium Oxide CeO₂ micro-crystal polishing powder is especially used for the polishing of micro-crystal plates and micro-crystal glass. This rare earth Cerium Oxide CeO₂ micro-crystal polishing powder has many advantages, including strong cutting force, high polishing speed, high gloss finish, good suspensibility, not easy to settle. The polishing effect of our rare earth Cerium Oxide CeO₂ micro-crystal polishing powder is three times better than that of normal micro-crystal polishing powder.

Main features:

1. High polishing speed, great grinding ability, no scratch.
2. Small amount and low concentration of polishing powder can make the optimum polishing effect.
3. Good polishing brightness, High content of Cerium Oxide, reasonable collocation of the crudeness and fineness, applicable for the polishing of various porcelains and ceramics.
4. Good suspensibility, not easy to settle. And even if the powder is settled for a long time, it is still easy to stir up without bubbles.
5. Environmental-friendly, neutral in PH value, water-fast, good adhesive force, easy to wash, no odors, humidity-resistant, long life time.

Packing:

Inner packing: plastic bag,

Weight: 5kg per bag.

Outer packing: cardboard carton, cardboard barrel, plastic barrel

Net Weight:

20kg/ cardboard carton, 25kg/ cardboard carton,
40kg /cardboard barrel, 50kg /cardboard barrel,
20kg/ plastic barrel, 25kg/ plastic barrel.
