

## Polishing Powder

UCOLIN<sup>COM</sup>

### Rare earth Cerium Oxide CeO<sub>2</sub> Optical Glass Polishing Powder -778-1

REO≥91%

CeO<sub>2</sub>/REO≥81%

Fluorine content: 3.1%

Average granularity D50: 1.5μm

Granularity: 800# -1000#

PH value: 7

Color: Pink

#### Applicable fields:

This serial of Rare earth Cerium Oxide CeO<sub>2</sub> optical glass polishing powder has been widely applied in the final polishing of glass deep processing areas, such as optical glass, conductive glass, ultra-thin glass, and other glass lens.

Rare earth Cerium Oxide CeO<sub>2</sub> optical glass polishing powder is especially used for the polishing of optical glass, eyeglass, etc. This rare earth Cerium Oxide CeO<sub>2</sub> optical glass polishing powder has many advantages, including strong cutting force, high polishing speed, high gloss finish, good suspensibility, not easy to settle. The polishing effect of our rare earth Cerium Oxide CeO<sub>2</sub> optical glass polishing powder is three times better than that of normal optical glass polishing powder.

#### Main features:

1. High polishing speed, great grinding ability, no scratch.
2. Small amount and low concentration of polishing powder can make the optimum polishing effect.
3. Good polishing brightness, High content of Cerium Oxide, reasonable collocation of the crudeness and fineness, applicable for the polishing of various glass.
4. Good suspensibility, not easy to settle. And even if the powder is settled for a long time, it is still easy to stir up without bubbles.
5. Environmental-friendly, neutral in PH value, water-fast, good adhesive force, easy to wash, no odors, humidity-resistant, long life time.

#### Packing:

Inner packing: plastic bag,  
Weight: 5kg per bag.

Outer packing: cardboard carton, cardboard barrel, plastic barrel

Net Weight:

20kg/ cardboard carton, 25kg/ cardboard carton,  
40kg /cardboard barrel, 50kg /cardboard barrel,  
20kg/ plastic barrel, 25kg/ plastic barrel.
