Rare earth erium Oxide CeO₂ Porcelain Polishing Powder -338-1

REO≥76%

CeO₂/REO≥76%

Fluorine content: 2.9%

Average granularity D50: 1.5μm

Granularity: 800# -1000#

PH value: 7

Color: Offwhite

Applicable fields:

This serial of Rare earth Cerium Oxide CeO₂ porcelain has been widely applied in the final polishing of porcelain and ceramics.

Rare earth Cerium Oxide CeO₂ porcelain polishing powder is especially used for the polishing of porcelain and ceramics. This rare earth Cerium Oxide CeO₂ glass-ceramic polishing powder has many advantages, including strong cutting force, high polishing speed, high gloss finish, good suspensibility, not easy to settle. The polishing effect of our rare earth Cerium Oxide CeO₂ porcelain polishing powder is three times better than that of normal porcelain polishing powder.

Main features:

1. High polishing speed, great grinding ability, no scratch.
2. Small amount and low concentration of polishing powder can make the optimum polishing effect.
3. Good polishing brightness, High content of Cerium Oxide, reasonable collocation of the crudeness and fineness, applicable for the polishing of various porcelains and ceramics.
4. Good suspensibility, not easy to settle. And even if the powder is settled for a long time, it is still easy to stir up without bubbles.
5. Environmental-friendly, neutral in PH value, water-fast, good adhesive force, easy to wash, no odors, humidity-resistant, long life time.

Packing:

Inner packing: plastic bag,

Weight: 5kg per bag.

Outer packing: cardboard carton, cardboard barrel, plastic barrel

Net Weight:

20kg/ cardboard carton, 25kg/ cardboard carton,
40kg /cardboard barrel, 50kg /cardboard barrel,
20kg/ plastic barrel, 25kg/ plastic barrel.
